

AACR Annual Meeting 2025: Locating Your Abstract Control Number

Your abstract control number can be found in any e-mail correspondence related to your abstract (such as a submission confirmation). You can also access your control number by logging into the abstract submission portal. The submission portal will open in early October and will be available through the AACR website: <https://www.aacr.org/meeting/aacr-annual-meeting-2025/abstracts/>

The screenshot shows the AACR 2025 abstract submission portal. At the top, there is a green header bar. Below it is a dark navigation bar with the AACR 2025 logo and two main menu items: "Meeting Information" and "Submissions 3". A red box highlights the "Submissions 3" link, with a callout box containing the text: "Click on the Submissions link to view your abstracts." Below the navigation bar, the main content area displays the event details: "AACR Annual Meeting 2025, April 25-30, 2025, Chicago, Illinois". Underneath, there is a section for "Submission Deadlines". A large red-bordered box contains the following text: "Your abstract submissions are listed at the bottom of the portal page. Submissions highlighted in green are complete and were sent to the program committee for review, while submissions highlighted in yellow are incomplete. The control number is listed just before the title of the abstract." Below this text, the "Abstract Submission" section lists two entries. The first entry, "#74 CDK9 inhibitor KB-0742 is active in preclinical models of small-cell lung cancer", is highlighted with a green bar on the left and has a red dot next to it. The second entry, "#3 Functional role of long non-coding RNA YTHDF3-AS1 in breast cancer", is highlighted with a yellow bar on the left. To the right of the submission list is a "Submission Resources" section with a link for "Abstract Guidelines".
